

SAIC ISS-2000 & SABER

Science Applications International Corporation's (SAIC) Marine Science & Technology Division (MSTD) in Newport, RI, has developed two unique surveying and processing products, **ISS-2000** and **SABER**, to provide professional hydrographers and surveyors with powerful, accurate, and efficient tools for planning and executing surveys, and for processing and analyzing hydrographic survey data

SAIC's **ISS-2000** Integrated Survey System supports a broad range of high performance, shallow and deep water survey operations including search and locate, mapping, and charting. **ISS-2000** has proven International Hydrographic Organization (IHO) accuracy in high speed, shallow water surveying and processing operations. Powerful acquisition and visualization capabilities give ISS-2000 higher efficiency and data yields while maintaining real-time quality assurance.

ISS-2000 is a fully developed SAIC product that offers a range of survey planning capabilities and data collection features. Its modular components are offered in price-performance packages that include fully integrated sensor suites with data acquisition systems and software, and which are scalable to transportable/portable models. Compatible with **SABER**, **ISS-2000** interfaces to internationally recognized sensors including both multibeam and singlebeam echosounders, GPS receivers, motion sensors, gyros, acoustic positioning systems, and autopilots.

SAIC's **SABER** (Survey **A**nalysis and area **B**ased **E**dito**R**) processes, edits, updates, views and analyzes hydrographic survey data. **SABER** efficiently processes massive data volumes and allows the operator to view the data geographically, review and assess fliers identified by the filter, compare multiple sources of bathymetry data, and perform interactive editing. Survey analysis with **SABER** provides the required file lists and time windows, generates tracklines, processes all navigation data, and applies any necessary correctors as well as automatic ping and beam flag filtering

The Area Based Editor replaces labor intensive line by line interactive editing, allowing operators to view and edit all data in an area simultaneously, directly retaining those edits in the full-resolution data files. By dividing large survey areas into sub-areas, **SABER** can systematically edit, filter, and smooth position data while recalculating depth data for different sound velocity profiles, and recalculating multibeam alignment calibrations for roll/pitch/azimuth offsets, and transducer and antenna mounting positions. **SABER** data products include volumetric reports for channel analysis; plots of final contours, tracklines and coverage; and junction analysis reports, smooth sheets and profile plots.

SAIC has successfully used **ISS-2000** and **SABER** to conduct surveys for the National Oceanic and Atmospheric Administration (NOAA), the Naval Oceanographic Office (NAVOCEANO), the US Army Corps of Engineers, the University of New Hampshire, and various commercial clients worldwide. SAIC's MSTD works closely with clients to determine appropriate solutions for their survey system needs, and adapts **ISS-2000** and **SABER** for their specific applications.

For questions and comments pertaining to the SABER product line please contact the following:

SAIC RUGGED IT SOLUTIONS

Science Applications International Corporation (SAIC), Tactical Information Systems Operation (TISO) develops, designs, and manufactures cost-effective COTS Information Technology (IT) solutions for military and industrial

applications. Our innovative concepts for compact, rugged and reliable systems are built to withstand shock, vibration, moisture, dirt and dust. Whether aboard a ship, aircraft, vehicle, or land-based, our rugged line of IT products are designed to withstand the harshest environments. TISO is also an ISO 9001:2000 certified organization. For descriptive literature on each of the products, go to www.tacinfosys.com.

WARRANTY FOR STANDARD PRODUCTS Return Material Authorization Procedures

**Please read the information below before you
REQUEST AN RMA NUMBER**

Warranty:

SAIC shall provide a one-year warranty against defects in material workmanship. SAIC will, at its sole discretion, repair or replace any product within one year of sale date which is examined and determined to be defective. All returns shall be sent to SAIC's Sterling Integration Facility: 45472 Holiday Drive, Suite 7, Sterling, VA 20166. Shipping expenses will be the sole responsibility of the buyer.

SAIC's liability under this warranty shall be limited to the repair or replacement of the defective unit. In no event shall SAIC be responsible for collateral or consequential damages.

Returned units shall require a RMA (returned material authorization) number available from SAIC. Returned units will not be accepted without both a RMA number and a copy of the Purchase Order. SAIC shall retain the right to utilize refurbished materials to complete any repair/replacement. All returned units shall be repaired/replaced within 120 days from receipt of defective unit. Any warranty/repair shall not extend the original one-year warranty period from date stated on Purchase Order.

This warranty does not cover units which are defective due to misuse, abuse, improper installation, neglect, improper shipping, damage caused by disaster, improper electrical current, or improper use of software.

This warranty does not cover units which have been altered or repaired by anyone other than SAIC's Sterling Integration Facility.

This warranty does not cover consumables such as fuses, lamps, etc.

If a claimed defect cannot be identified or replicated at SAIC's Sterling Integration Facility, buyer will be responsible for all costs incurred.

Buyer agrees that there is no warranty of merchantability or fitness for a particular use, express or implied, which extend beyond the scope of this warranty agreement.

Post Warranty Returns:

Items outside one (1) year warranty period.

SAIC will evaluate and determine costs of repair for a fee of \$300. After receipt of PO for evaluation fee and non-warranty item, SAIC will provide an estimate of repair no later than 15 business days. If the associated labor, materials, and shipping does not exceed the \$300 evaluation fee, SAIC will repair the item and return it to the customer. If the estimate of repair exceeds the \$300 evaluation fee, the \$300 fee will be credited to the total cost of repair.

After customer receipt of repair estimate SAIC will return the item to the customer if SAIC hasn't received a repair contract after 60 days.

SAIC will return the repaired item no later than 90-days after receipt of repair contract.

Customers shall follow standard Return Material Authorization (RMA) procedures for post warranty repair returns.

SAIC will provide a 90 day warranty from day of shipment for parts that are repaired or replaced under a non-warranty contract.

Hardware:

"SAIC expressly warrants the products provided under this contract as meeting the applicable SAIC product specifications. SAIC makes no other warranties, either express or implied (including, without limitation, warranties as to merchantability or fitness for a particular purpose). Purchaser retains responsibility for the application and functional adequacy of the offering. In addition, the following shall constitute the exclusive remedies for any breach by SAIC of its warranties hereunder: SAIC warrants that all products provided under this contract shall be free from defects in material, workmanship, and title. SAIC agrees to either replace or repair, free of charge, any such product, component, or part thereof which shall be returned to the nearest authorized repair facility, provided that the defect is discovered within 1 year from date of delivery; transportation charges for return to repair facility prepaid by purchaser. Return transportation to purchaser shall be at SAIC expense. Any product or component, or part thereof so replaced or repaired shall be warranted by SAIC for the remainder of the original warranty period or 3 months, whichever is longer. Any and all such replacements or repairs necessitated by inadequate preventive maintenance, or by normal wear and usage, or by the fault of purchaser, shall be at purchaser's expense."

Currently Warranted Products:

The following TISD products are covered by the standard product warranty stated above:

- Color Monitor Products
- LCD Flat Panel Display Products
- CLSD Projector Products
- Rack Install Kit Products
- Passive LINK-11 Tap Products
- Power Distribution Assembly Product Line

Return Material Authorization Procedures:

Returned units shall require a Returned Material Authorization (RMA) number available from the Tactical Information Systems Division of SAIC. Contact TISD Engineering Support at (703) 676 - 9148 / 9100, complete our [online RMA request form](http://www.tacinfosys.com) at <http://www.tacinfosys.com>, or email: rma-tisd@saic.com, to obtain a RMA number. Supply the SAIC Part Number and SAIC Serial Number of the product to be repaired. If available, the original Purchase Order Number should also be provided.

Products for repair should be shipped postage pre-paid to TISD. Products will not be accepted without an RMA number. Please place the RMA number on the outside of the package. SAIC shall retain the right to utilize refurbished materials to complete any repairs/replacement. All returned units shall be repaired or replaced by TISD within ninety (90) to one hundred twenty (120) calendar days from receipt at TISD. Return shipment of repaired products will be at TISD expense. All shipping costs for products outside of the warranty period will be at customer's expense.

All products being returned for either warranty or other required repair service should be shipped to:

SAIC

Tactical Information Systems Division/ISID

45472 Holiday Drive, Suite 7

Sterling, VA 20166

ATTN: RMA Department/Engineering Support / RMA# _____

It is the responsibility of the customer to provide SAIC's TISD with return shipping instructions.

NOTE: The Standard Warranty and Return Material Authorization Procedures depicted above are subject to change without prior written notice.

RECONFIGURABLE TACTICAL OPERATIONS SIMULATOR (RTOS)

OVERVIEW

SAIC's Reconfigurable Tactical Operations Simulator (RTOS) is a modular, high-fidelity, soldier-in-the-loop, real-time Distributed Interactive Simulation/HLA-compliant computer simulation with the capability to support tactical data link interfaces to tactical equipment. It provides realistic air defense training and analytical capabilities.

APPLICATIONS

RTOS is both an analytical tool and training device with embedded Patriot, HAWK, THAAD, SLAMRAAM and MEADS models. It has been invaluable in performing Army Air Defense software requirement studies and conducting operator effectiveness and performance assessments. RTOS supports rapid and inexpensive responses to changes in weapon system software and supports the analyst's need for specific modifications necessary to analyze system performance capabilities. For seamless integration into exercises and experiments with live higher echelon participation; the RTOS Patriot, THAAD, MEADS and SLAMRAAM models have Tactical Digital Information Link - J (TADIL-J) data links.

This capability allows the RTOS models to represent a battalion with multiple fire units to a higher echelon element, providing air picture and supporting command and control messages. RTOS models have been used to participate in over 100 distributed exercises since 1995 by the U.S. Army/National Guard; the German, Netherlands, Kuwaiti Air Forces; and the Japanese Air Self Defense Force.

FEATURES

RTOS consists of a hardware configuration based on high-performance workstations to emulate multiple air defense elements. The latest graphics technology is used with programmable, reconfigurable consoles comprised of four LCD touch-screen displays. Actual switches and controls are represented on touch-sensitive panels, a joystick and mouse. Following actual specifications, both appearance and function of any represented operator console are generated by easily edited high-order language software to implement system modifications or new systems.

BENEFITS

RTOS is a realistic soldier-in-the-loop simulation of multiple Army Air Defense weapons systems and regularly supports DIS/HLA exercises. Its open system architecture can be adapted to growing needs without costly redesign and allows for easy, low-risk modifications, extensions, or additions, supporting rapid, inexpensive responses to changes in weapon system software. RTOS hardware is easily transported and capable of supporting exercises anywhere in the world.

GEOROVER® SOFTWARE PRODUCTS

GeoRover geospatial software products are developed by Science Applications International Corporation (SAIC) and are designed and sold as extensions or “plug-ins” to the ArcMap™ component of Environmental Systems Research Institute (ESRI®) ArcGIS® Desktop GIS software versions 8.x and 9.x.

GeoRover Tools for ArcGIS Extensions Description

Locus Track – powerful tools for geospatial feature data creation, editing, and geospatial data fusion

The GeoRover Locus Track extension is optimized for importing, creating, editing, and exporting data through the powerful ArcGIS system, all from a single toolbar. These tools will save valuable time and reduce required training. Using unique and flexible import tools, editing interfaces, and export wizards, work with data from many sources (text files, spreadsheets, databases) and in many different coordinate formats. Using the Locus Track tools, generate ArcGIS data products or ArcGIS-derived products in seconds. Import Excel® spreadsheets (with coordinates) into geodatabase feature classes with a few mouse clicks or generate entire PowerPoint® presentations and web pages from ArcGIS layers within seconds. These examples and much more can be accomplished with the Locus Track extension. Key features:

- Create complete PowerPoint presentations for all (or selected) features from your GIS data. All slide elements (main content, title, text bullets, and insets) are automatically generated and user customizable
- Export ArcMap display and layers into interactive HTML file(s) with hyperlinks and user-defined pop-up labels
- GeoRover tools are compatible with geodatabases (personal and enterprise [ArcSDE®])
- Interactive (point-and-click) and coordinate-based tools for creating and editing features from shapefiles and geodatabase feature classes (personal and enterprise)
- One-step editing of point, line, and area (polygon) features and their attributes
- Add linked data (video, images, audio, documents, slides, spreadsheets, databases, URLs, etc.) to any feature
- Access any linked data with a simple point and click
- Graphically depicts which shapes have linked data, for quick reference
- Wizard-driven import of points, lines, or areas from any delimited text (.csv, .txt, .tab, etc.), Excel spreadsheet, database (Access, Oracle®, SQL Server, etc.) or typed/pasted text with coordinates. The end result is the creation of a layer or data added to an existing layer (geodatabase or shapefile)
- All coordinate-based tools accept DD, DM, DMS, UTM, MGRS and XY coordinates
- Add coordinate attributes (Lat/Lon, DD, DM, DMS, UTM, MGRS or XY) to any point layer for one-step coordinate conversion
- Coordinate attributes are verified and updated automatically each time point is moved or edited

Digital Data Tracker – field data collection tools and real-time map navigation

The GeoRover Digital Data Tracker extension is the field data collection component of the GeoRover product suite. It provides tools for easily importing track logs and waypoint logs from a variety of GPS receivers into ArcMap™. Using the GPS track information, digital files (images, video clips, audio clips, text) collected in the field from a variety of devices can be automatically georeferenced. Track logs and georeferenced data layers are saved as shapefiles or can be added to existing feature classes in a personal or ArcSDE® geodatabase. The result is an interactive map display with links to field data that can be exported as a web page for easy information sharing. Key Features:

- Downloads track logs and waypoints from GPS receivers into new or existing ArcMap layers
- Supports Garmin® (serial and USB), Magellan® (serial) and NMEA GPS protocols
- Real-time track log with moving map display for navigation includes heading and current coordinate readout

- Georeferences and plots field data (digital images, video clips, audio recording, etc.) by correlating the data with the GPS information
- Flexible data collection options:
 - GPS receiver and digital camera only (or other device) in the field. **No pc or cable connections required**
 - Real-time with tablet/laptop PC
- Export ArcMap display and layers into interactive HTML file with hyperlinks and user-defined pop-up labels
- Use the Geolocation Wizard to georeference data using non-standard track logs, different time offset methods, and to set up real-time geolocation functionality with the real-time track log mode
- Synchronize PC time to GPS receiver time with single click
- Access the georeferenced field data from maps and images with simple point and click
- Add new points to existing geolocated data by clicking on display or entering coordinates (DD, DM, DMS, UTM, MGRS)
- Add/change linked data (video, images, audio, documents, slides, spreadsheets, databases, URLs, etc.) using standard windows Explorer interface

Zoom Tools – rapid map zooming and “go-to” capabilities

- One-click zoom to common scales (5K, 25K, 50K, 100K, 250K, 500K, 1M, 2M, 5M, 10M)
- Go-to (pan-and-zoom) specific coordinate locations (DD, DM, DMS, UTM, MGRS, XY)
- Show graphic on screen for any coordinate
- Instantly convert between all supported coordinate formats: Decimal Degrees (DD), Degrees Decimal Minutes (DM), Degrees Minutes Seconds (DMS), Universal Transverse Mercator (UTM), Military Grid Reference System (MGRS), and XY
- Access to dozens of other zoom scale buttons via the customize toolbar options. Options range from 1:1,000 to 1:100,000,000

GeoRover Software Annual Maintenance is available for purchase at a prorated fee based on a month-to-month calculation. It is intended for customers that require the annual maintenance Period of Performance (POP) to have the same date. Determine the prorated maintenance fee by calculating the amount of time between the existing POP end date and the desired POP end date. The prorated fee is the monthly maintenance rate for each whole month in the prorated time period. If there are 15 or fewer days remaining outside a whole month the fee will be calculated as a half month. If there are 16 or more days remaining outside a whole month the fee will be calculated as a whole month. Customers buying new GeoRover software licenses are required to purchase the minimum annual maintenance term to be eligible to purchase maintenance at a prorated fee.

Typical **GeoRover® software training** classes conducted at an SAIC location or a customer location are typically one (1) to (5) days in length depending on class skill level. These class topics are instructor-led, hands on training for one (1) to (5) students. This training daily rate includes commutable travel equal to or less than one hour travel time from the instructor’s home base office to the customer location/facility.

GeoRover Customer Site Training, half day travel**

Customers who would rather have Instructor-led training at their site can purchase a fixed price rate to cover travel time to and from a client site. Half day travel equates to greater than one hour and equal to or less than four hours travel time from the instructor’s home base office to the customer location/facility.

GeoRover Customer Site Training, full day travel**

Customers who would rather have Instructor-led training at their site can purchase a fixed price rate to cover travel time to and from a client site. Full day travel equates to greater than four hours travel time from the instructor’s home base office to the customer location/facility.

** Additional travel costs will be incurred for travel time to customer site. Customer site Training will also require that the customer reimburse at cost for all travel expenses (transportation, lodging, per diem).

PATHFINDER

Pathfinder is a complete, award-winning suite of computer tools designed to facilitate the processing and analysis of data derived from large and diverse information sources. SAIC has incorporated over 22 years of analyst input into Pathfinder software technology.

This engineering effort allows users to reach new levels of productivity in the effective processing and analysis of data. Pathfinder is built by analysts, for analysts and is not intended to replace human intelligence in the analytical process. Instead Pathfinder aids the analyst in performing their job by offering tools that support the collection, analysis, production and dissemination of a first rate intelligence product.

The SAIC Software Support Bundle for Pathfinder Version 5.6 is offered to agencies of the United States government. It is required to operate Pathfinder as it provides both the text search engine and data extraction component of the overall software application. The Pathfinder Support Bundle is based on a Client/Server Architecture which is reflected in the pricing structure. The Pathfinder license price is based on a concurrent user set basis.

Software maintenance and technical support must be acquired at the time of application installation, and represents an annual fee equivalent to 10% of the Price Per User Set of the installed Pathfinder product. Subsequent software maintenance and technical support fees are due in full prior to the start of the next annual maintenance and technical support period.

For additional information on Pathfinder Products, Services and Support please visit the SAIC web site: <http://www.saic.com/products/software/pathfinder/> or contact SAIC via e-mail: customer_support@pf-cvl.net or via phone: 1-877-283-3911 ext. 8547.

TERATEXT

The TeraText® Database Systems (DBS) is the next-generation system for text. Designed to maximize the lifetime value of your text assets, this unique system is enterprise-wide and global, linking disparate information sources housed in multiple locations. It's fast. It's accurate. It's scalable - and it manages text ranging from a few gigabytes to terabyte-size and beyond, making huge text solutions both affordable and fast. The TeraText DBS is multilingual and supports over 250 document types. The dynamic, XML-native TeraText DBS conforms to industry standards for maximum interoperability on multiple hardware platforms. Its flexibility and adaptability allow it to integrate with both legacy systems and desktop applications. Its sophisticated compression technology and indexing capabilities keep indexes to a manageable size so that large data problems don't become even larger. With applications in the intelligence, legislation management, technical documentation, information portals, education, publishing, [clinical](#) research, patenting and FDA clearance we can provide solutions for many different types of text intensive projects.

Alloptic IT Passive Optical Network (PON) Infrastructure

Reduce IT Costs. Improve Performance. Increase Reliability. Enhance Security. Conserve Natural Resources.

Alloptic, long time OEM providing equipment to the cable TV industry, is now helping to revolutionize Information Technology Infrastructure (ITI) with the introduction of its PON product solutions. The Alloptic equipment provides a fiber optic solution built around proven standardized PON technology that converges voice, video (RF or IP), data, security cameras, wireless antennas and building management sensors over the same single-mode fiber. Additionally, Alloptic's diverse PON product line allows for easy scalability, supporting anywhere from 50 to 50,000 or more end-point devices very cost effectively. By using Alloptic PON equipment on new construction or renovation projects, organizations can take a powerful leap forward in alleviating the power, space, cooling, and bandwidth limitation issues that have been a burden to the IT market space for years.

Quantifiable and Compelling Benefits

Alloptic's PON equipment is capable of transmitting very high data rates from 40 feet to 40 miles with absolutely no active electronics in between the data center and desktop or end-point device. The centralization of high-value IT equipment in a single location eliminates the need for the traditional work group switches in riser closets, greatly reducing the electronic components comprising the network. Fewer electronics translate into fewer failure points in the Alloptic PON network and a more reliable ITI with virtually unlimited bandwidth potential. This simplified architecture combined with competitive Alloptic pricing means savings of up to 40 percent on ITI installation costs and 80 percent savings on IT-related power, space, and cooling requirements. Implementing an Alloptic PON also means that fewer trained IT professionals are required to maintain the network, reducing IT operations and maintenance costs by up to 80 percent. Together, these savings truly earn Alloptic PON the label of **Green IT**.

Bridging the Past to the Future

Designed around the many features and benefits of single-mode fiber, Alloptic's PON is comprised of three main components; the Optical Network Terminal (ONT), passive optical splitters, and Optical Line Terminal (OLT). As a pure Layer-2 transport IT Infrastructure solution, Alloptic equipment interoperates seamlessly with current IP networks, building a bridge from the past to the future so that organizations can get full life-cycle use out of their present data center equipment while covering themselves against the unforeseen IT requirements of the future. The OLT is the heart of the Alloptic PON, performing traditional Layer-2 addressing and prioritization functions. The ONT sits near the end-point device and serves as a media converter and network security gateway. In between the OLT and ONT are strategically placed PON splitters engineered to maximize the scalability of the ITI.

The SAIC Advantage

As the exclusive Alloptic distributor to the government, SAIC has incorporated Alloptic equipment into a system we call Secure Converged Solution or SCS. Working tirelessly with Alloptic developers, SAIC personnel have been able to engineer out unwanted costs and features of the Alloptic equipment that is required in the cable TV markets while perfecting a methodology for providing our customers with a lower-cost, highly reliable, better performing, and more future-proof IT Infrastructure solution to stretch their valuable IT investment dollars.

For immediate assistance in understanding more about SCS or to schedule a tour of SAIC's new Alloptic-powered 7-story facility in Columbia, MD, or to help place your order for just the right amount of Alloptic equipment to satisfy your IT requirements please contact:

132-8	Alloptic	SAIC	PSAC003	-48VDC 150W brick	\$201.70

ARBOR NETWORKS – NETWORK SECURITY, DDOS AND WORM PROTECTION

The availability of network information systems is critical to today's military, economic, and core infrastructure. Threats such as zero-day worms, exposed VPN clients, and misuse and abuse can severely impact our nation's security and prosperity. There is no margin for errors or delays to this infrastructure, with services that span telecommunications, utility, transportation, emergency services, and financial systems.

Arbor Networks offers a portfolio of solutions to address these challenges and meet the unique requirements of government providing secure, reliable communications and preserving network availability.

Peakflow X

Recent events have shown us that the availability of internal government networks that carry mission-critical communications must be maintained to avert and resolve any security issue that may arise.

Designed from the ground up as an Internal Network Security System, Arbor's [Peakflow® X](#) can help agencies and companies meet the challenges they face to actively defend their networks from worm outbreaks, eliminate insider misuse and abuse, and harden against future threats. Built to meet the demands of large, active networks, Peakflow X provides a comprehensive, real time understanding of activity across the entire network. Only with this network-wide perspective can network administrators actively defend their networks from worm outbreaks, eliminate insider misuse, and harden against future threats.

Peakflow SP

At the core of our national defense lies an infrastructure that enables our coalition forces to share mission critical information with the utmost speed. This enables situations to be accessed as they are developing and make decisions that are measured not in dollars, but in lives.

[Peakflow® SP](#) (comprised of Peakflow DoS and Peakflow Traffic) protects these networks from a broad spectrum of security and operational threats. Peakflow SP's [Infrastructure Security](#) features provide network operators with the ability detect and mitigate network-wide anomalies, such as distributed denial of service (DDoS) attacks and worms (e.g. Blaster, MyDoom). Peakflow SP's [Traffic and Routing](#) features model traffic across the entire network, enabling operators to make informed business decisions about routing, transit, partners and customers. Built upon the [Peakflow Platform](#), Peakflow SP enables network operators to maintain constant availability of networks that carry mission-critical communications, while bolstering security and assuring the reliability of public network and Internet services.

BIGFIX INC.

BigFix®, Inc. is a leading provider of high-performance enterprise systems and security management solutions that revolutionizes the way IT organizations manage and secure their computing infrastructures. Based on a revolutionary architecture that distributes management intelligence directly to the computing devices themselves, BigFix is radically faster, scalable, more accurate and adaptive than legacy management software. Today, BigFix provides real-time visibility and control for over 9 million computing devices for 900 customers worldwide. The BigFix customer list counts many of the world's largest and most prestigious organizations in every industry including financial services, retail, education, manufacturing, and public sector agencies

A Unified Platform for Systems and Security Management

Today, BigFix provides 18 applications within a single-console, single-agent unified management platform addressing the following solution domains:

- System Lifecycle Management
- Endpoint Protection
- Security Configuration Management and Vulnerability Management

Unified management with BigFix also extends across a remarkable breadth of computing platforms:

- Desktops, laptops, handhelds – fixed and mobile
- Servers – physical and virtual
- Windows, Unix, Linux, Mac, & virtual operating systems

Highlighted Solution Module: Power Management

Offered as a stand-alone product or as part of the BigFix Systems Lifecycle Management Pack, BigFix Power Management allows IT organizations to enforce conservation policies across the enterprise, while providing granularity that enables application of these policies to a single computer. For end users, BigFix Power Management maximizes power policy deployment while minimizing usage impact through an optional “opt-in” approach. Granular controls also allow end users to save their work before shutting the system down - ensuring no loss to productivity.

Features and Benefits

- Saves up to \$50 per year per BigFix-managed device depending on local electricity costs and net energy savings achieved
- Centralized, policy-driven power management of distributed computers scalable from individual machines to entire global enterprises
- Fine-grained controls for hibernation/ standby, subsystem-only shut down and "save work before shutdown" options
- Wake-On-LAN support synchronizes systems maintenance processes with power conservation
- "Opt-in" programs encourage end-user participation as well as "Wake-on-Web" feature to allow for end-users to remotely connect and turn on their own systems

132-51	BigFix, Inc.	PS-GSA-1-IS-USR	Remote Upgrade Service (4 hours) - Remote upgrade services for customers with up to 40,000 endpoints. Key activities typically include: (i) review of upgrade process, benefits of upgrade, potential changes of behavior, requirements, and features in new version; (ii) pre-upgrade health checks and review of current configuration of BigFix deployment including upgrade impact on any customized integrations and/or customizations; (iii) assistance with planning and/or performing upgrade of BigFix components; (iv) post-upgrade health checks and review and (v) project management. This offering consists of an estimated four (4) hours to be delivered remotely. This service is recommended for each BigFix major product upgrade for best results.	\$846.30
132-51	BigFix, Inc.	PS-GSA-1-IS-USA	Advanced Upgrade Service (32 hours) - Remote upgrade services for customers with up to 40,000 endpoints. Key activities typically include: (i) review of upgrade process, benefits of upgrade, potential changes of behavior, requirements, and features in new version; (ii) pre-upgrade health checks and review of current configuration of BigFix deployment including upgrade impact on any customized integrations and/or customizations; (iii) (optional) offline upgrade test on backup system; (iv) assistance with planning and/or performing upgrade of BigFix components; (v) post-upgrade health checks and review and (vi) project management. This offering consists of an estimated thirty-two (32) hours of services with no more than sixteen (16) to be delivered on-site.	\$6,770.40
132-51	BigFix, Inc.	PS-GSA-1-FD-5PK	Custom Fixlet Pack (5 Custom Fixlets) - Custom Fixlet development of up to five (5) "standard" custom Fixlets. Examples of "standard" Fixlets include: OS configuration changes, deploying software packages, and detecting problematic configurations. It is expected that customers will provide detailed technical requirements in written form for each Fixlet. On average, BigFix professional services engineers can develop well-specified Fixlet requests with two (2) hours of effort. In the event that any single Fixlet request exceeds four (4) hours of actual effort, the customer's pool of Fixlets will be decremented proportionate to the actual time required. Custom Fixlets are not warrantied, BigFix will not provide ongoing support of Custom Fixlets and it is customer's responsibility to perform testing prior to implementation. Turnaround time averages 5 business days for most requests. Custom Fixlets will expire within one (1) year of the effective date of the agreement.	\$2,115.75

Q Continuum System enables healthcare organizations to improve patient outcomes and dramatically reduce costs by making medical management processes more efficient.

This revolutionary technology is fundamentally transforming healthcare delivery across the entire Continuum of Care. Q Continuum System has been designed to facilitate medical management through a fully integrated database of patient and provider information – coordinating all interactions using Web-based workflow management. It supports the real-time communications of information between all members of the care team, inside and outside the four walls of a traditional healthcare setting.

Q Continuum System encapsulates over 15 years of work with leading edge healthcare organizations nationwide, in the implementation of technology to support care management best practices.

The features and functions provided have evolved in real world medical management environments, with significant guidance from healthcare professionals at all levels.

Leading healthcare organizations use Q Continuum System for seamless integration of:

- Utilization management
- Case Management
- Disease Management
- Referral Management
- Outcomes management

FUTURE POINT SYSTEMS

The **Starlight Visual Information System** is information visualization software that enables the graphical analysis and synthesis of large quantities of disparate and complexly related information. By making abstract relationships among information objects *visible*, Starlight enables exciting and powerful new forms of information access, understanding, and control. Starlight's capabilities are completely generic, making it applicable to a broad range of problems. Starlight is being used in applications as diverse as counterterrorism, intelligence analysis, law enforcement, public safety, supply chain management, market research, computer forensics, and cybersecurity. In the military intelligence arena, Starlight enables command and control centers to process large volumes of message traffic quickly. Further, Starlight supports the integration and concurrent analysis of message data with other kinds of information. Examples include free-text data, spreadsheet data, database records, and raster and vector geospatial data.

Starlight is software for *sensemaking*—that is, a tool that enables you to directly manipulate and understand the *meaning* inherent in your information. Taking advantage of emerging theories about how humans naturally organize, relate, and synthesize information about the world around them, Starlight enables you to similarly organize, relate, and synthesize the digital information that you have at your disposal. This approach makes it possible for you to more easily integrate the information available to you with your own knowledge and expertise. Starlight can also provide an ideal framework for more traditional data mining techniques. Starlight enables mining results to be placed into contexts that help make their significance more understandable.

Starlight enables you to derive value from large, heterogeneous information collections in two ways. The first is by helping you find particular items or sets of items that are germane to the problems you are trying to solve. The second is by helping you discover and understand important, anomalous, or otherwise meaningful relationships that exist among the items in your collections. Unlike traditional link analysis software, however, Starlight incorporates a broad range of integrated visualization capabilities into its design. In addition to standard network, timeline, and geospatial visualization capabilities, Starlight includes tools for visualizing conceptual similarities among free-text content; hierarchical relationships among items; complex structured property relationships; and category memberships, among others. Further, Starlight includes comprehensive information preprocessing capabilities that can be used to augment information prior to use, greatly increasing its analytical value. Together, these capabilities form an advanced visual analytics platform capable of accelerating and improving a wide range of sensemaking tasks.

For questions and comments concerning any products and services offered by Future Point Systems, please contact the following.

Starlight XML Engineering Environment (XEE) Software License

XEE is the "Extract, Transform, Load" (ETL) component of Starlight. XEE provides data ingestion, transformation, filtering, and routing functionality, and also interfaces directly with Starlight Servers. Unlike traditional ETL software, however, XEE also allows information to be enriched with additional content prior to analysis. XEE can dynamically process live data streams, and uses a graphical programming interface to simplify the specification of information processing tasks. This product consists of two components, the Starlight XEE Workbench and the Starlight XEE Service.

Starlight Server Software License

The Starlight Server is the main information storage, search, and retrieval component of Starlight. The integrated data warehouse can manage gigabytes of XML and multimedia data. The Server also enables Starlight Client users to share a variety of other analytical resources, facilitating collaboration via the exchange of related data. This product consists of two components, the Starlight Server and the Starlight Server Administrator. The Server Administrator is used to monitor Server activity, manage data resources, and administer users and access privileges.

Starlight Client Software License

The Starlight Client is the primary interface for manipulating, analyzing, and understanding information. The Client provides a variety of search and retrieval functions for accessing information stored in Starlight Servers. Further, the Starlight Client facilitates comparison and recombination of the retrieved material. Most significantly, the Starlight Client generates rich, interactive graphical representations that can reveal key items and relationships present within large, heterogeneous information collections.

Starlight XML Engineering Environment (XEE) Annual Maintenance

Annual Maintenance includes Product Upgrades and Software Support.

Support means the provision, when and if available, of assistance with the Licensed Software by telephone or Internet during Standard Business Hours, including: (a) clarification of functions and features of the Licensed Software; (b) clarification of the Documentation; (c) guidance in the operation of the Licensed Software; and (d) error verification, analysis and correction.

Starlight Server Annual Maintenance

Annual Maintenance includes Product Upgrades and Software Support.

Support means the provision, when and if available, of assistance with the Licensed Software by telephone or Internet during Standard Business Hours, including: (a) clarification of functions and features of the Licensed Software; (b) clarification of the Documentation; (c) guidance in the operation of the Licensed Software; and (d) error verification, analysis and correction.

Starlight Client Annual Maintenance

Annual Maintenance includes Product Upgrades and Software Support.

Support means the provision, when and if available, of assistance with the Licensed Software by telephone or Internet during Standard Business Hours, including: (a) clarification of functions and features of the Licensed Software; (b) clarification of the Documentation; (c) guidance in the operation of the Licensed Software; and (d) error verification, analysis and correction.

Starlight Instructor-led Classroom Training (1-day)*

Starlight Visual Information system (VIS) instructor led training covers all Future Point Systems Inc. (FPS) products. SAIC will tailor instructor-led hands on training based on the needs of the customer.

The Starlight Visual Information System is information visualization software that enables the graphical analysis and synthesis of large quantities of disparate and complexly related information. By making abstract relationships among information objects visible, Starlight enables exciting and powerful new forms of information access, understanding, and control. Starlight's capabilities are completely generic, making it applicable to a broad range of problems. Starlight is being used in applications as diverse as counterterrorism, intelligence analysis, law enforcement, public safety, supply chain management, market research, computer forensics, and cyber-security. In the military intelligence arena, Starlight enables command and control centers to process large volumes of message traffic quickly. Further, Starlight supports the integration and concurrent analysis of message data with other kinds of information like free-text data, database records, spreadsheet data, and raster and vector geospatial data.

Typical Starlight VIS classes conducted at an SAIC location or a customer location are typically one (1) to five (5) days in length depending on class skill level. Per class topics may include "Introduction to Starlight VIS", "Introduction to XEE and Data Engineering", and "Advanced VIS Solutions". These class topics are instructor-led, hands on training for one (1) to (5) students. This training daily rate includes commutable travel equal to or less than one hour travel time from the instructor's home base office to the customer location/facility.

Starlight Customer Site Training, half day travel**

Customers who would rather have Instructor-led training at their site can purchase a fixed price rate to cover travel time to and from a client site. Half day travel equates to greater than one hour and equal to or less than four hours travel time from the instructor's home base office to the customer location/facility.

Starlight Customer Site Training, full day travel**

Customers who would rather have Instructor-led training at their site can purchase a fixed price rate to cover travel time to and from a client site. Full day travel equates to greater than four hours travel time from the instructor's home base office to the customer location/facility.

*Price is for one day of training, up to five students. Classes larger than 5 students will require two instructors and the purchase of two units of training.

Additional travel costs will be incurred for travel time to customer site. Customer site Training and Starlight Services Support will also require that the customer reimburse at cost for all travel expenses (transportation, lodging, per diem).

STARLIGHT

SOFTWARE SUPPORT AND MAINTENANCE SERVICES

(STANDARD LEVEL)

The terms contained in this **Attachment 1** shall govern the provision of Support and Maintenance services provided by FPS to CUSTOMER for the Licensed Software. In the event of a conflict between this **Attachment 1** and the End User License, the terms in **the End User License** shall take precedence.

1. DEFINITIONS

“Level 1 Error” means a program error that prevents operation of critical documented functions with high frequency or duration.

“Level 2 Error” means a program error that has some impact on administration, non-critical operation or other secondary functions for which a temporary work around has been provided.

“Level 3 Error” means a program error with little or no impact on productivity, impacting unsupported software or functions or a request for an enhancement or additional functionality that is not due to a defect in the Licensed Software.

“Response Time” means the elapsed time between the receipt of a Support Call and the target time within which FPS will respond to CUSTOMER.

“Standard Business Hours” means FPS’ standard hours of Support which are currently Monday through Friday, 6:00 a.m. to 6:00 p.m. Pacific Standard Time in the Americas (except for observed United States Federal holidays).

“Support” means the provision, when and if available, of assistance with the Licensed Software by telephone or Internet during Standard Business Hours, including: (a) clarification of functions and features of the Licensed Software; (b) clarification of the Documentation; (c) guidance in the operation of the Licensed Software; and (d) error verification, analysis and correction.

“Support Call” shall mean a call to FPS technical support at any error level.

2. MAINTENANCE AND SUPPORT

Scope. CUSTOMER understands that, except in the first year of the Agreement, Support and Maintenance Services is not a prerequisite to licensing the Licensed Software; provided, however, that for so long as CUSTOMER is current in the payment of all Fees and remains in compliance with the requirements in this **Attachment 1**, CUSTOMER shall be entitled to: (a) Upgrades, to the extent made generally available (“**Maintenance**”), and (b) Support. Notwithstanding anything else herein, after the first year, FPS is only required to provide Support and Maintenance for the specific Licensed Software for which CUSTOMER has paid the Support and Maintenance Renewal Fee.

Response Times. Upon receipt of a Support Call, FPS will respond as provided below. All Response Times are during Standard Business Hours only. CUSTOMER can receive immediate email notification of receipt of a Support Call by contacting FPS’ Global Support email at support@futurepointssystems.com or logging into the Web site. If CUSTOMER is not available, FPS will not be liable for adhering to the below Response Times. At no time does FPS guarantee a “fix” during a Response Time.

Error Level	Response Time	Target Resolution Time
Level 1	4 hours	48 hours
Level 2	Same business day	One week
Level 3	One week	Next maintenance release

Subcontracting. FPS may engage the services of sub-contractors to perform any of its duties of Support; however, unless otherwise agreed in writing, no sub-contracting of such duties shall relieve FPS of its responsibilities hereunder.

Software Version. Support and Maintenance Services will only be provided for the most current version of the Licensed Software and the version of the Licensed Software released immediately prior to such current version. Support and Maintenance Services for the Licensed Software prior to the current version will be for a period up to nine (9) months from the release date of the current version.

Level of Effort. FPS will use commercially reasonable efforts commensurate with the then applicable industry standards to provide the Support in a professional and workmanlike manner, but FPS does not guarantee that every question or problem raised by CUSTOMER will be resolved. When, at FPS' discretion, on-site Support is required, CUSTOMER will reimburse FPS for all related traveling expenses and costs for board and lodging with all Professional Services to be rendered at the Standard Rates.

3. EXCLUSIONS. The Support and Maintenance Fee (initial or Renewal Fee) does not include services requested as a result of causes or errors that are not attributable to FPS or cannot be reproduced by FPS on unmodified Licensed Software. In the event that CUSTOMER requests FPS to provide, and FPS does so provide, any services in connection with causes or errors which are not attributable to FPS, CUSTOMER shall pay FPS for such additional services on a time and materials basis at FPS' then-current standard rates. Causes or errors that are not attributable to FPS include the following:

- Negligent use, hardware malfunction, Force Majeure, or causes other than through ordinary or authorized use;
- Use of the Licensed Software on or with hardware, software or other equipment that deviates from FPS or manufacturer operating specifications;
- Failures due to the failure of any third party hardware, software or other equipment;
- Modification or addition, or attempted modification or addition to the Licensed Software undertaken by CUSTOMER or under CUSTOMER'S direct or indirect control;
- CUSTOMER software or third party software not licensed through FPS;
- CUSTOMER'S failure to implement the current version of the Licensed Software that is issued under this **Attachment 1**; and
- Failure by CUSTOMER to respond to any action plans provided by FPS pursuant to a CUSTOMER Support Call.

4. CUSTOMER RESPONSIBILITIES

Procedures. CUSTOMER shall properly train its personnel in the proper use of the Licensed Software and the equipment on which the Licensed Software is loaded and operating.

Reporting. CUSTOMER shall document and promptly report all errors or malfunctions of the Licensed Software to FPS. FPS will provide CUSTOMER with a trouble ticket number that CUSTOMER will use to track the status of each issue. CUSTOMER shall take all steps necessary to carry out any procedures FPS may give for the rectification of errors or malfunctions within a reasonable time after such procedures have been provided. FPS reserves the right to close the trouble ticket without further responsibility or liability if CUSTOMER does not provide appropriate feedback to FPS within thirty (30) days of receiving new Licensed Software, a workaround for a problem, or fails to respond to a request for additional information.

Access. CUSTOMER shall provide FPS with access to CUSTOMER'S personnel and equipment during Standard Business Hours to facilitate Support requests. CUSTOMER acknowledges that remote access will speed up resolution of Support issues.

Third Party Agents. If CUSTOMER utilizes third party support services or products to support the Licensed Software, CUSTOMER shall ensure such third party support is at a similar or higher level of support as CUSTOMER has secured with FPS. CUSTOMER acknowledges and agrees that FPS shall not be held responsible for delayed Response Times and Support should information from third party support be unavailable or delayed.

Third Party Products and Support. If requested, FPS will attempt on CUSTOMER'S behalf to secure maintenance and support on third party products not serviced under this **Attachment 1**; however, it may be necessary for CUSTOMER to secure a separate maintenance agreement directly with the manufacturer.

CUSTOMER Contacts. CUSTOMER shall appoint up to 3 individuals who are knowledgeable in the operation of the Licensed Software to serve as primary CUSTOMER contacts with FPS for Support Calls. All Support Calls shall be initiated through these contacts. CUSTOMER may change its primary or alternate contacts at any time upon written notification to FPS. CUSTOMER may appoint additional primary contacts upon FPS' receipt of the then applicable fees.

Voice Print International, Inc.

Voice Print allows government agencies, first responders, contact centers and trading floors, to securely capture, retrieve, evaluate, and improve mission-critical voice and data interactions. The award winning **Activ! Suite™** of real time interactions recording and workforce optimization solutions prevents the loss of mission-critical data and helps organizations to focus on their core objectives and responsibilities. By enabling efficient sharing of crucial interactions, the recreation of entire events, and communication with personnel in real time, Voice Print solutions can make a significant impact on an organization's effectiveness – mitigating risk, ensuring regulatory compliance, optimizing processes, and boosting productivity. Designed with reliability, adaptability, and expandability in mind, Voice Print solutions accommodate changing technologies, customer needs, and legislation. For more than a decade, Voice Print has been providing proven technology and superior service to more than 1,000 customers in over 25 countries. This dedication and commitment to excellence has resulted in a customer loyalty rate of 98%.

Overview of Products

Activ! Voice Voice Recording Software – Easy to use, maintain and upgrade, the Activ! Voice digital call recording application is fully scalable from four to an unlimited number of recording channels. Activ! Voice enables organizations to capture call taker interactions from traditional and Voice over IP telephones and from traditional or trunked radio. Activ! Voice provides CTI compatibility for much cheaper, yet efficient, D-channel data capture, and direct digital integration with all major PBXs. Capture all associated data – date, time, call taker ID, ANI/ALI, radio ID, alias, talkgroup ID, and more. The powerful rules engine allows you to define exactly which calls to retain and for how long. Archive an unlimited number of calls using redundant centralized online storage, distributed storage, removable DVD-RAM media, or a combination of all three. Activ! Voice offers ultimate reliability and resiliency due to a wide variety of robust, fault-tolerant configurations that leverage standards-based components. Built around the principles of true open architecture, Activ! Voice call recording software provides unmatched flexibility in inwards and outwards integrations, endless scalability, and limitless capacity.

Activ! View Screen Recording Software – With Voice Print's Activ! View desktop screen capture application, call sampling can be applied beyond telephone interaction. The application is designed to trigger recording of screen activity based on ACD calls, non-ACD calls, outbound calls and/or non-telephone electronic events. Continuous real-time recording with Activ! View's Fast Transport protocol captures only the pixels representing the changes from the call taker's PC and does not constantly retransmit data. For supervisors, Activ! View captures all activity on call takers' desktops. Call takers do not see a flash or flicker on their screen, nor do they experience any performance degradation when a supervisor is monitoring.

Activ! IQ Call Taker Evaluation Software – Gain valuable insights into call taker performance and quality assurance with Voice Print's innovative call taker assessment solution. Evaluations have never been easier to conduct – just point and click to retrieve a recording and custom-built evaluation form. This unique call taker evaluation software provides flexibility in evaluation forms generation, customized scoring forms, Intuitive graphical scoring techniques and real-time evaluation. Different templates and scoring weights can be used for different applications, in order to deliver the most effective results possible to meet the needs of any given environment.

Activ! Analytics Performance Management Software – This powerful performance management solution collects data and presents real time and historical performance information to call takers, supervisors, and managers within the contact center environment. Key performance indicators, quality scores, scheduling information and service level indicators can be distributed to personnel using desktop dashboards, Web-based consolidated reporting, and TV monitor display systems. The Activ! Analytics dashboard is an interactive, dynamic, multi-view application that shows different types of information including individual and group telephony metrics, messages, links to training, FAQs, and any other content that can drive performance. The messaging feature lets supervisors send out timely messages and bulletins to an individual call taker, group of call takers, or even an entire division.

Activ! eLearning Automated Coaching and Training – Train and coach call takers with Voice print's **Activ! eLearning** by delivering dynamic, rules-generated training courses, tests, and quizzes. Provide your

team with the tools they need to learn, proactively self-correct, and improve their performance. Measure, track, and report – generate comprehensive reports, develop report cards, and track the effectiveness of your training. Easily create new, feature-rich multimedia training materials or use existing training resources.

Activ! Insight *Speech Mining and Analytics* – Voice Print’s Activ! Analytics call mining and analytics application enables organizations to extract intelligence from their call recordings. Activ! Insight uses speech recognition technologies that listen to all contact center conversations and keep track of what is being said. This allows contact centers to mine conversations and quickly identify call trends that otherwise would have been too costly and time consuming to uncover. Activ Insight provides multiple search criteria and trending features, which in turn deliver a broad scope of actionable intelligence.

132-32	VoicePrint Int'l	SAIC	VP-OAICM-NEC	OAI - NEC channel manager - SW Only. Licensed per recording server. **Requires OAI and Infolink enabled PBX.	\$1,454.58
132-32	VoicePrint Int'l	SAIC	VP-OAICM-InterTel	OAI - Inter-Tel channel manager - SW Only. Licensed per recording server. OAI Link must be Version 5 or greater.	\$1,454.58
132-32	VoicePrint Int'l	SAIC	VP-OAISL	OAI (Mitel, NEC or Inter-Tel) Site License - SW Only. Licensed per site. Requires channel manager.	\$4,363.73
132-32	VoicePrint Int'l	SAIC	VP-Detrunk-Net2	Motorola De-trunking data capture integration. SW Only.	\$4,363.73
132-32	VoicePrint Int'l	SAIC	VP-Detrunk-Zone	Motorola De-trunking Channel Manager for Smart Zone Systems. SW Only.	\$14,545.78
132-32	VoicePrint Int'l	SAIC	VP-Detrunk-Net	Motorola De-trunking Channel Manager for Smart Net Systems. SW Only.	\$7,272.89
132-32	VoicePrint Int'l	SAIC	VP-CACM	Cisco Avvid channel manager - SW Only. Licensed per recording server.	\$1,454.58
132-32	VoicePrint Int'l	SAIC	VP-CASL	Cisco Avvid Site License - SW Only. Licensed per site. Requires channel manager.	\$4,363.73

132-32	VoicePrint Int'l	SAIC	VP-CECM	Concerto Ensemble channel manager - SW Only. Licensed per recording server.	\$1,454.58
132-32	VoicePrint Int'l	SAIC	VP-CESL	Concerto Ensemble Site License - SW Only. Licensed per site. Requires channel manager.	\$4,363.73
INTEGRATION SOFTWARE					
132-32	VoicePrint Int'l	SAIC	VP-MSN	De-trunking interface for Motorola Smart Net 3600 baud system. REQUIRES RF-MODEM, RIM II to be installed at customer site	\$8,330.01
132-32	VoicePrint Int'l	SAIC	VP-MSZ	De-trunking interface for Motorola Smart Zone 3600 baud system. REQUIRES RF-MODEM, RIM II to be installed at customer site	\$8,330.01
132-32	VoicePrint Int'l	SAIC	VP-MSZ-Reader	Smart Zone Reader. Sits on the SmartZone LAN and listens to ATIA port. Captured the UDP packets. Requires a dedicated PC with 2 NIC cards.	\$6,935.13
132-32	VoicePrint Int'l	SAIC	VP-MLF	License fee for Motoroal SmartNet de-trunking solution	\$1,178.78
132-34	VoicePrint Int'l	SAIC	VP-M-support	1st Year Support on all de-trunking interfaces	\$2,239.67
WORKFORCE OPTIMIZATION ACTIVATION SOFTWARE					
132-32	VoicePrint Int'l	SAIC	VP-Activ!VIQ	Active! Voice & Activ!IQ Combined License. Per Activated Position. Includes voice recording and agent evaluation.	\$436.37
132-32	VoicePrint Int'l	SAIC	VP-Activ!Suite	Active! SUITE License. Per Activated Channel. Includes Activ!Voice, Activ!View & Activ!IQ	\$494.56
132-32	VoicePrint Int'l	SAIC	VP-Analytics	Activ! Analytics Activation License. Per Seat	\$356.66
132-32	VoicePrint Int'l	SAIC	VP-Analytics/eLearn	Activ! Analytics and Activ! eLearning Activation Licenses. Per Seat	\$459.65
132-32	VoicePrint Int'l	SAIC	VP-AnalyticsSL	Activ! Analytics Server Activation License. Per Processor	\$3,141.89
132-32	VoicePrint Int'l	SAIC	VP-DataConnectors	Activ! Analytics/eLearning Data Connectors. Per Data Source	\$11,636.63
132-32	VoicePrint Int'l	SAIC	VP-eLearning	Activ! eLearning Activation License. Per Seat	\$244.37
132-32	VoicePrint Int'l	SAIC	VP-Insight	Activ! Insight Activation License. Per Seat	\$203.64
132-32	VoicePrint Int'l	SAIC	VP-InsightSL	Activ! Insight Server Activation License. Per Server	\$7,331.07
132-32	VoicePrint Int'l	SAIC	VP-InsightCL	Activ! Insight Client Activation License. Per Concurrent Connection	\$3,665.54
132-32	VoicePrint Int'l	SAIC	VP-InsightTS	Activ! Insight Tireless Supervisor Activation License. Per Site	\$10,996.61
132-32	VoicePrint Int'l	SAIC	VP-IQ	Activ! IQ Agent Evaluation License. Per Seat	\$174.55
132-32	VoicePrint Int'l	SAIC	VP-IQSL	Activ! IQ Agent Evaluation Server License. Per Server. Includes 5 VP-CLIENT-AIQ licenses	\$1,745.49
132-32	VoicePrint Int'l	SAIC	VP-AR	Activ!Reports Server License. Allows reporting across Activ!Voice, Activ!View and Activ!IQ	\$5,818.31
132-32	VoicePrint Int'l	SAIC	VP-VW	Activ! View Host License. Per Recorded Desktop	\$58.18
132-32	VoicePrint Int'l	SAIC	VP-VWSL	Activ! View Screen Capture Server License. Per Server	\$1,745.49
SOFTWARE OPTIONS					
132-32	VoicePrint Int'l	SAIC	VP-MSS	Voice Recording Multi-Server Support. Per recording server in excess of 1	\$2,327.32
132-32	VoicePrint Int'l	SAIC	VP-LMP	Live Monitoring over phone lines. Per Dedicated Analog Channel	\$29.09
132-32	VoicePrint Int'l	SAIC	VP-LML	Live Monitoring over LAN. Per Simultaneous Session. Requires Rich Client	\$29.09
132-32	VoicePrint Int'l	SAIC	VP-PP	Perishable Pin Feature. Per Dedicated Analog Channel	\$29.09
132-32	VoicePrint Int'l	SAIC	VP-RP	Remote Playback Feature. Per Dedicated Analog Channel	\$29.09

132-32	VoicePrint Int'l	SAIC	VP-IR	Instant Recall from Workstation. Price per workstation.	\$290.92
132-32	VoicePrint Int'l	SAIC	VP-CLIENT-AV	Client application for Search & Playback.	\$465.47
132-32	VoicePrint Int'l	SAIC	VP-CLIENT-AIQ	Client application for Agent Evaluation (Activ!IQ Supervisor License)	\$465.47
132-32	VoicePrint Int'l	SAIC	VP-AWCLIENT	Enables Activ!Web Client for browser access to Voice Print server.	\$2,909.16
132-32	VoicePrint Int'l	SAIC	VP-Login	Enables Activ! Voice to capture agent and associate that data with call files via work station log-in. Requires each agent has unique agent log-in name & password. Per workstation.	\$14.55
132-32	VoicePrint Int'l	SAIC	VP-Append	Flag or add comments to a live call. Per workstation	\$14.55
132-32	VoicePrint Int'l	SAIC	VP-AXDEV	VPI's API kit. Does NOT include support or services with regards to toolkit. Services can be purchased for support on custom development	\$29.09
132-32	VoicePrint Int'l	SAIC	VP-CMD	Record on Demand. PER USER. All other channels will be in vox recording mode.	\$290.92
132-32	VoicePrint Int'l	SAIC	VP-MPD	Multi-Playback Device Application	\$290.92
132-32	VoicePrint Int'l	SAIC	VP-PSAP	Public Safety Enhanced Feature Set Package	\$1,454.58
132-32	VoicePrint Int'l	SAIC	VPB-CH-1	Beep tone activation, charge per analog channel.	\$29.09
132-32	VoicePrint Int'l	SAIC	VP-CID1	Caller ID Activation, price per channel. Can only be utilized on analog channels.	\$29.09
132-32	VoicePrint Int'l	SAIC	VP-RNMS	Remote Network Monitoring Software. Must run on a computer on the same network as Voice Print server(s)	\$378.19
132-32	VoicePrint Int'l	SAIC	VP-S	Voice Print Select (Scheduler)	\$5,818.31
132-32	VoicePrint Int'l	SAIC	VP-VRA	Variable Retention Archive Feature	\$2,909.16
132-32	VoicePrint Int'l	SAIC	VP-PCANYWHERE	Symantec pcAnywhere	\$26.18
SERVER OPTIONS					
132-8	VoicePrint Int'l	SAIC	VP-2U-RAID1	Alliance 2U Chassis - Win2003 Server (Raid 1: Dual 250 GB SATA Drives).	\$6,561.85
132-8	VoicePrint Int'l	SAIC	VP-4U-RAID5	Voice Print Maxi Chassis - Win2003 Server - RAID 5: 4 * 250 GB SATA Drives	\$6,630.61
132-8	VoicePrint Int'l	SAIC	VP-4U-RAID1	Voice Print Maxi Chassis - Win2003 Server - RAID 1: Dual 250 GB SATA Drives	\$5,825.11
132-8	VoicePrint Int'l	SAIC	VP-read-PC	De-trunking Reader PC	\$1,198.42
132-8	VoicePrint Int'l	SAIC	VP-trunk-PC	De-trunking data capture PC	\$1,198.42
132-8	VoicePrint Int'l	SAIC	VP-PERIPHERALS	Monitor, Keyboard, Mouse and Speakers Package	\$333.99
132-8	VoicePrint Int'l	SAIC	VP-ServerKit	Server Peripheral Kit for CPE: includes DVD-RAM Drive, soundcard, modem, remote diagnostic software and USB Mini Hub.	\$442.04
132-8	VoicePrint Int'l	SAIC	VP-RLKT	Sliding Rail Kit (excludes HP servers)	\$98.23
VOICE INTERFACE UNITS					
132-8	VoicePrint Int'l	SAIC	VP-Digital-8	8 Port Digital Interface Card.	\$1,335.95
132-8	VoicePrint Int'l	SAIC	VP-Digital-16	16 Port Digital Interface Card.	\$2,131.62
132-8	VoicePrint Int'l	SAIC	VP-Digital-24	24 Port Digital Interface Card.	\$2,927.29
132-8	VoicePrint Int'l	SAIC	VP-Analog-4	4 Port Analog Interface Card.	\$697.44
132-8	VoicePrint Int'l	SAIC	VP-Analog-8	8 Port Analog Interface Card.	\$884.08
132-8	VoicePrint Int'l	SAIC	VP-Analog-16	16 Port Analog Interface Card.	\$1,679.75
132-8	VoicePrint Int'l	SAIC	VP-Analog-24	24 Port Analog Interface Card.	\$2,357.55
132-8	VoicePrint Int'l	SAIC	VP-T1/E1-1	Single Span T1 / E1 / PCM 32 Interface Card.	\$2,829.06
132-8	VoicePrint Int'l	SAIC	VP-T1/E1-2	Dual Span T1 / E1 / PCM 32 Interface Card.	\$3,958.72

132-8	VoicePrint Int'l	SAIC	VP-VoIP-30	VoIP Interface Licensing. Supports up to 30 IP recorded channels.	\$2,740.65
132-8	VoicePrint Int'l	SAIC	VP-VoIP-60	VoIP Interface Licensing. Supports up to 60 IP recorded channels.	\$2,740.65
132-8	VoicePrint Int'l	SAIC	VP-VoIP-120	VoIP Interface Licensing. Supports up to 120 IP recorded channels.	\$4,214.12
132-8	VoicePrint Int'l	SAIC	VP-VoIP-240	VoIP Interface Licensing. Supports up to 240 IP recorded channels.	\$7,023.53
132-8	VoicePrint Int'l	SAIC	VP-VoIP-Tap Card	VoIP Span Interface.	\$3,300.57
132-8	VoicePrint Int'l	SAIC	VP-VoIP-Tap Box	VoIP Net Tap Box Interface.	\$491.16
132-8	VoicePrint Int'l	SAIC	VP-RTS	RTS Interface Box. Order one box for every 24 channels when interfacing with the following PBX: Mitel SX 2000; Rolm 9751 CVX; Avaya Index	\$245.58
132-8	VoicePrint Int'l	SAIC	VP-MITEL	Direct Digital Integration to the Mitel SX 2000. Per channel.	\$34.38
ADDITIONAL YEAR OF MAINTENANCE FOR VOICE RECORDING ACTIVATION LICENSE					
132-34	VoicePrint Int'l	SAIC	VP-AVSW-PS-M	Additional Year of Maintenance for Activ! Voice Recording License - Public Sector. Per Activated Channel.	\$55.86
132-34	VoicePrint Int'l	SAIC	VP-AVSW-M	Additional Year of Maintenance for Activ! Voice Recording License. Per Activated Channel.	\$80.68
132-34	VoicePrint Int'l	SAIC	VP-AVSW-RDT-M	Additional Year of Maintenance for Activ! Voice Recording License for Redundant Systems. Per Activated Channel.	\$43.44
132-34	VoicePrint Int'l	SAIC	VP-AVSW-upgd1-M	Additional Year of Maintenance for Upgrade of Activ! Voice Recording Licenses already owned. Tier: 0 - 1 year. Per Activated Channel.	\$18.62
132-34	VoicePrint Int'l	SAIC	VP-AVSW-upgd2-M	Additional Year of Maintenance for Upgrade of Activ! Voice Recording Licenses already owned. Tier: 1 - 2 years. Per Activated Channel.	\$32.27
132-34	VoicePrint Int'l	SAIC	VP-AVSW-upgd3-M	Additional Year of Maintenance for Upgrade of Activ! Voice Recording Licenses already owned. Tier: 2 - 3 years. Per Activated Channel.	\$48.41
132-34	VoicePrint Int'l	SAIC	VP-AVSW-upgd4-M	Additional Year of Maintenance for Upgrade of Activ! Voice Recording Licenses already owned. Tier: 3 - 4 years. Per Activated Channel.	\$64.54
132-34	VoicePrint Int'l	SAIC	VP-AVSW-upgd5-M	Additional Year of Maintenance for Upgrade of Activ! Voice Recording Licenses already owned. Tier: 4+ years. Per Activated Channel.	\$72.61
ADDITIONAL YEAR OF MAINTENANCE FOR VOICE RECORDING CHANNEL MANAGERS					
132-34	VoicePrint Int'l	SAIC	VP-DCHL-M	Additional Year of Maintenance for D-Channel Monitoring channel manager. Licensed per activated digital recording channel.	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-RCCM-M	Additional Year of Maintenance for Remote Control channel manager (include record on demand). Licensed per activated recording channel that utilizes this trigger	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-WFR-M	Additional Year of Maintenance for Wait for Ring Feature. Licensed per activated recording channel.	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-CTICM-M	Additional Year of Maintenance for CTI channel manager - SW Only. Licensed per server. Requires VP-CTISL	\$372.37
132-34	VoicePrint Int'l	SAIC	VP-CTISL-M	Additional Year of Maintenance for CTI Site License - SW Only. Licensed per site. Requires channel manager.	\$1,613.61
132-34	VoicePrint Int'l	SAIC	VP-CMAPICM-M	Additional Year of Maintenance for CMAPI channel manager - SW Only. Licensed per server. Requires VP-CMAPISL	\$620.62

132-34	VoicePrint Int'l	SAIC	VP-CMAPISL-M	Additional Year of Maintenance for CMAPI Site License - SW Only. Licensed per site. Requires channel manager.	\$4,592.59
132-34	VoicePrint Int'l	SAIC	VP-FMCM-M	Additional Year of Maintenance for Follow Me! channel manager - SW Only. Licensed per server. Requires VP-FMSL	\$310.31
132-34	VoicePrint Int'l	SAIC	VP-FMSL-M	Additional Year of Maintenance for Follow Me! Site License - SW Only. Licensed per site. Requires channel manager.	\$1,551.55
132-34	VoicePrint Int'l	SAIC	VP-OAICM-Mitel-M	Additional Year of Maintenance for OAI - Mitel channel manager - SW Only. Licensed per recording server. **Requires Mitel Application Service Unit (APSU) enabled.	\$310.31
132-34	VoicePrint Int'l	SAIC	VP-OAICM-NEC-M	Additional Year of Maintenance for OAI - NEC channel manager - SW Only. Licensed per recording server. **Requires OAI and Infolink enabled PBX.	\$310.31
132-34	VoicePrint Int'l	SAIC	VP-OAICM-InterTel-M	Additional Year of Maintenance for OAI - Inter-Tel channel manager - SW Only. Licensed per recording server. OAI Link must be Version 5 or greater.	\$310.31
132-34	VoicePrint Int'l	SAIC	VP-OAISL-M	Additional Year of Maintenance for OAI (Mitel, NEC or Inter-Tel) Site License - SW Only. Licensed per site. Requires channel manager.	\$930.93
132-34	VoicePrint Int'l	SAIC	VP-DeTrunk-Net2-M	Additional Year of Maintenance for Motorola De-trunking data capture integration. SW Only.	\$930.93
132-34	VoicePrint Int'l	SAIC	VP-DeTrunk-Zone-M	Additional Year of Maintenance for Motorola De-trunking Channel Manager for Smart Zone Systems. SW Only.	\$3,103.10
132-34	VoicePrint Int'l	SAIC	VP-DeTrunk-Net-M	Additional Year of Maintenance for Motorola De-trunking Channel Manager for Smart Net Systems. SW Only.	\$1,551.55
132-34	VoicePrint Int'l	SAIC	VP-CACM-M	Additional Year of Maintenance for Cisco Avvid channel manager - SW Only. Licensed per recording server.	\$310.31
132-34	VoicePrint Int'l	SAIC	VP-CASL-M	Additional Year of Maintenance for Cisco Avvid Site License - SW Only. Licensed per site. Requires channel manager.	\$930.93
132-34	VoicePrint Int'l	SAIC	VP-CECM-M	Additional Year of Maintenance for Concerto Ensemble channel manager - SW Only. Licensed per recording server.	\$310.31
132-34	VoicePrint Int'l	SAIC	VP-CESL-M	Additional Year of Maintenance for Concerto Ensemble Site License - SW Only. Licensed per site. Requires channel manager.	\$930.93
ADDITIONAL YEAR OF MAINTENANCE FOR INTEGRATION SOFTWARE					
132-34	VoicePrint Int'l	SAIC	VP-MSN-M	Additional Year of Maintenance for De-trunking interface for Motorola Smart Net 3600 baud system. REQUIRES RF-MODEM, RIM II to be installed at customer site	\$1,052.57
132-34	VoicePrint Int'l	SAIC	VP-MSZ-M	Additional Year of Maintenance for De-trunking interface for Motorola Smart Zone 3600 baud system. REQUIRES RF-MODEM, RIM II to be installed at customer site	\$1,052.57
132-34	VoicePrint Int'l	SAIC	VP-MSZ-Reader-M	Additional Year of Maintenance for Smart Zone Reader. Sits on the SmartZone LAN and listens to ATIA port. Captured the UDP packets. Requires a dedicated PC with 2 NIC cards.	\$876.32
132-34	VoicePrint Int'l	SAIC	VP-MLF-M	Additional Year of Maintenance for License fee for Motoroal SmartNet de-trunking solution	\$148.95
132-34	VoicePrint Int'l	SAIC	VP-M-support-M	Additional Year of Maintenance for 1st Year Support on all de-trunking interfaces	\$1,945.64
ADDITIONAL YEAR OF MAINTENANCE FOR WORKFORCE OPTIMIZATION ACTIVATION SOFTWARE					

132-34	VoicePrint Int'l	SAIC	VP-Activ!VIQ-M	Additional Year of Maintenance for Active! Voice & Activ!IQ Combined License. Per Activated Position. Includes voice recording and agent evaluation.	\$93.09
132-34	VoicePrint Int'l	SAIC	VP-Activ!Suite-M	Additional Year of Maintenance for Active! SUITE License. Per Activated Channel. Includes Activ!Voice, Activ!View & Activ!IQ	\$105.51
132-34	VoicePrint Int'l	SAIC	VP-Analytics-M	Additional Year of Maintenance for Activ! Analytics Activation License. Per Seat	\$76.09
132-34	VoicePrint Int'l	SAIC	VP-Analytics/eLearn-M	Additional Year of Maintenance for Activ! Analytics and Activ! eLearning Activation Licenses. Per Seat	\$98.06
132-34	VoicePrint Int'l	SAIC	VP-AnalyticsSL-M	Additional Year of Maintenance for Activ! Analytics Server Activation License. Per Processor	\$670.27
132-34	VoicePrint Int'l	SAIC	VP-DataConnectors-M	Additional Year of Maintenance for Activ! Analytics/eLearning Data Connectors. Per Data Source	\$2,482.48
132-34	VoicePrint Int'l	SAIC	VP-eLearning-M	Additional Year of Maintenance for Activ! eLearning Activation License. Per Seat	\$52.13
132-34	VoicePrint Int'l	SAIC	VP-Insight-M	Additional Year of Maintenance for Activ! Insight Activation License. Per Seat	\$43.44
132-34	VoicePrint Int'l	SAIC	VP-InsightSL-M	Additional Year of Maintenance for Activ! Insight Server Activation License. Per Server	\$1,563.96
132-34	VoicePrint Int'l	SAIC	VP-InsightCL-M	Additional Year of Maintenance for Activ! Insight Client Activation License. Per Concurrent Connection	\$781.98
132-34	VoicePrint Int'l	SAIC	VP-InsightTS-M	Additional Year of Maintenance for Activ! Insight Tireless Supervisor Activation License. Per Site	\$2,345.94
132-34	VoicePrint Int'l	SAIC	VP-IQ-M	Additional Year of Maintenance for Activ! IQ Agent Evaluation License. Per Seat	\$37.24
132-34	VoicePrint Int'l	SAIC	VP-IQSL-M	Additional Year of Maintenance for Activ! IQ Agent Evaluation Server License. Per Server. Includes 5 VP-CLIENT-AIQ licenses	\$372.37
132-34	VoicePrint Int'l	SAIC	VP-AR-M	Additional Year of Maintenance for Activ!Reports Server License. Allows reporting across Activ!Voice, Activ!View and Activ!IQ	\$1,241.24
132-34	VoicePrint Int'l	SAIC	VP-VW-M	Additional Year of Maintenance for Activ! View Host License. Per Recorded Desktop	\$12.41
132-34	VoicePrint Int'l	SAIC	VP-VWSL-M	Additional Year of Maintenance for Activ! View Screen Capture Server License. Per Server	\$372.37
ADDITIONAL YEAR OF MAINTENANCE FOR SOFTWARE OPTIONS					
132-34	VoicePrint Int'l	SAIC	VP-MSS-M	Additional Year of Maintenance for Voice Recording Multi-Server Support. Per recording server in excess of 1	\$496.50
132-34	VoicePrint Int'l	SAIC	VP-LMP-M	Additional Year of Maintenance for Live Monitoring over phone lines. Per Dedicated Analog Channel	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-LML-M	Additional Year of Maintenance for Live Monitoring over LAN. Per Simultaneous Session. Requires Rich Client	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-PP-M	Additional Year of Maintenance for Perishable Pin Feature. Per Dedicated Analog Channel	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-RP-M	Additional Year of Maintenance for Remote Playback Feature. Per Dedicated Analog Channel	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-IR-M	Additional Year of Maintenance for Instant Recall from Workstation. Price per workstation.	\$62.06
132-34	VoicePrint Int'l	SAIC	VP-CLIENT-AV-M	Additional Year of Maintenance for Client application for Search & Playback.	\$99.30
132-34	VoicePrint Int'l	SAIC	VP-CLIENT-AIQ-M	Additional Year of Maintenance for Client application for Agent Evaluation (Activ!IQ Supervisor License)	\$99.30
132-34	VoicePrint Int'l	SAIC	VP-AWCLIENT-M	Additional Year of Maintenance for Enables Activ!Web Client for browser access to Voice Print server.	\$620.62

132-34	VoicePrint Int'l	SAIC	VP-Login-M	Additional Year of Maintenance for Enables Activ! Voice to capture agent and associate that data with call files via work station log-in. Requires each agent has unique agent log-in name & password. Per workstation.	\$3.10
132-34	VoicePrint Int'l	SAIC	VP-Append-M	Additional Year of Maintenance for Flag or add comments to a live call. Per workstation	\$3.10
132-34	VoicePrint Int'l	SAIC	VP-AXDEV-M	Additional Year of Maintenance for VPI's API kit. Does NOT include support or services with regards to toolkit. Services can be purchased for support on custom development	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-CMD-M	Additional Year of Maintenance for Record on Demand. PER USER. All other channels will be in vox recording mode.	\$62.06
132-34	VoicePrint Int'l	SAIC	VP-MPD-M	Additional Year of Maintenance for Multi-Playback Device Application	\$62.06
132-34	VoicePrint Int'l	SAIC	VP-PSAP-M	Additional Year of Maintenance for Public Safety Enhanced Feature Set Package	\$310.31
132-34	VoicePrint Int'l	SAIC	VPB-CH-1-M	Additional Year of Maintenance for Beep tone activation, charge per analog channel.	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-CID1-M	Additional Year of Maintenance for Caller ID Activation, price per channel. Can only be utilized on analog channels.	\$6.21
132-34	VoicePrint Int'l	SAIC	VP-RNMS-M	Additional Year of Maintenance for Remote Network Monitoring Software. Must run on a computer on the same network as Voice Print server(s)	\$80.68
132-34	VoicePrint Int'l	SAIC	VP-S-M	Additional Year of Maintenance for Voice Print Select (Scheduler)	\$1,241.24
132-34	VoicePrint Int'l	SAIC	VP-VRA-M	Additional Year of Maintenance for Variable Retention Archive Feature	\$620.62
132-34	VoicePrint Int'l	SAIC	VP-PCANYWHERE-M	Additional Year of Maintenance for Symantec pcAnywhere	\$5.59
ADDITIONAL YEAR OF MAINTENANCE FOR SERVER OPTIONS					
132-12	VoicePrint Int'l	SAIC	VP-2U-RAID1-M	Additional Year of Maintenance for Alliance 2U Chassis - Win2003 Server (Raid 1: Dual 250 GB SATA Drives).	\$590.57
132-12	VoicePrint Int'l	SAIC	VP-4U-RAID5-M	Additional Year of Maintenance for Voice Print Maxi Chassis - Win2003 Server - RAID 5: 4 * 250 GB SATA Drives	\$596.75
132-12	VoicePrint Int'l	SAIC	VP-4U-RAID1-M	Additional Year of Maintenance for Voice Print Maxi Chassis - Win2003 Server - RAID 1: Dual 250 GB SATA Drives	\$524.26
132-12	VoicePrint Int'l	SAIC	VP-read-PC-M	Additional Year of Maintenance for De-trunking Reader PC	\$107.86
132-12	VoicePrint Int'l	SAIC	VP-trunk-PC-M	Additional Year of Maintenance for De-trunking data capture PC	\$107.86
132-12	VoicePrint Int'l	SAIC	VP-PERIPHERALS-M	Additional Year of Maintenance for Monitor, Keyboard, Mouse and Speakers Package	\$30.06
132-12	VoicePrint Int'l	SAIC	VP-ServerKit-M	Additional Year of Maintenance for Server Peripheral Kit for CPE: includes DVD-RAM Drive, soundcard, modem, remote diagnostic software and USB Mini Hub.	\$39.78
132-12	VoicePrint Int'l	SAIC	VP-RLKT-M	Additional Year of Maintenance for Sliding Rail Kit (excludes HP servers)	\$8.84
ADDITIONAL YEAR OF MAINTENANCE FOR VOICE INTERFACE UNITS					
132-12	VoicePrint Int'l	SAIC	VP-Digital-8-M	Additional Year of Maintenance for 8 Port Digital Interface Card.	\$120.24
132-12	VoicePrint Int'l	SAIC	VP-Digital-16-M	Additional Year of Maintenance for 16 Port Digital Interface Card.	\$191.85

132-12	VoicePrint Int'l	SAIC	VP-Digital-24-M	Additional Year of Maintenance for 24 Port Digital Interface Card.	\$263.46
132-12	VoicePrint Int'l	SAIC	VP-Analog-4-M	Additional Year of Maintenance for 4 Port Analog Interface Card.	\$62.77
132-12	VoicePrint Int'l	SAIC	VP-Analog-8-M	Additional Year of Maintenance for 8 Port Analog Interface Card.	\$79.57
132-12	VoicePrint Int'l	SAIC	VP-Analog-16-M	Additional Year of Maintenance for 16 Port Analog Interface Card.	\$151.18
132-12	VoicePrint Int'l	SAIC	VP-Analog-24-M	Additional Year of Maintenance for 24 Port Analog Interface Card.	\$212.18
132-12	VoicePrint Int'l	SAIC	VP-T1/E1-1-M	Additional Year of Maintenance for Single Span T1 / E1 / PCM 32 Interface Card.	\$254.62
132-12	VoicePrint Int'l	SAIC	VP-T1/E1-2-M	Additional Year of Maintenance for Dual Span T1 / E1 / PCM 32 Interface Card.	\$356.28
132-12	VoicePrint Int'l	SAIC	VP-VoIP-30-M	Additional Year of Maintenance for VoIP Interface Licensing. Supports up to 30 IP recorded channels.	\$246.66
132-12	VoicePrint Int'l	SAIC	VP-VoIP-60-M	Additional Year of Maintenance for VoIP Interface Licensing. Supports up to 60 IP recorded channels.	\$246.66
132-12	VoicePrint Int'l	SAIC	VP-VoIP-120-M	Additional Year of Maintenance for VoIP Interface Licensing. Supports up to 120 IP recorded channels.	\$379.27
132-12	VoicePrint Int'l	SAIC	VP-VoIP-240-M	Additional Year of Maintenance for VoIP Interface Licensing. Supports up to 240 IP recorded channels.	\$632.12
132-12	VoicePrint Int'l	SAIC	VP-VoIP-Tap Card-M	Additional Year of Maintenance for VoIP Span Interface.	\$297.05
132-12	VoicePrint Int'l	SAIC	VP-VoIP-Tap Box-M	Additional Year of Maintenance for VoIP Net Tap Box Interface.	\$44.20
132-12	VoicePrint Int'l	SAIC	VP-RTS-M	Additional Year of Maintenance for RTS Interface Box. Order one box for every 24 channels when interfacing with the following PBX: Mitel SX 2000; Rolm 9751 CVX; Avaya Index	\$22.10
132-12	VoicePrint Int'l	SAIC	VP-MITEL-M	Additional Year of Maintenance for Direct Digital Integration to the Mitel SX 2000. Per channel.	\$3.09
