

Job Title: 001768 – Solutions Architect 2

Based in: Aberdeen

Grade: 19

Salary Range: up to £65,900 (depending on skills and experience) plus excellent flexible benefits

Job Description:

SAIC are currently looking for Solution Architects to work within our Enterprise Asset Management (EAM) Practice, based in Aberdeen. Main duties and responsibilities will be creating Work Management (WM) &/or Supply Chain Management (SCM) functional & business solutions, co-ordinating these duties with the EAM Systems Architect after which the EAM Practice will promote & implement with customers - onshore, offshore & at remote sites.

Duties Include:

- Creating & assessing business and functional solutions for clients to components across the EAM landscape, not merely in the CMMS (Maximo, SAP PM, Ventyx, IFS, JD Edwards)
- Working with the EAM Systems Architect in the design & delivery of end-to-end business solutions in the EAM area of operational competence.
- Identification, design and effective communication of technical and/or business solutions to business problems in the EAM area of operational competence.
- Definition and analysis of business requirements and design of cost effective and value enhancing solutions in the EAM area of operational competence.
- Design and costing of technical solutions in bids and proposals in the EAM area of operational competence.
- Proactive pre-sales technical consultancy leading to multi million £ awards in the EAM area of operational competence.

Candidates must possess:

- Flexibility and willingness to work at SAIC or customer sites throughout the UK
- Longstanding experience with a Computerised Maintenance Management System (CMMS) like Maximo (v5+), SAP Planned Maintenance, JD Edwards, Datastream, Ventyx (Indus) Asset Suite
- Long standing experience with enterprise-wide Work Management and Supply Chain Management
- Experience of assessing the management of change across the EAM landscape
- Long standing experience with business processes for Work Management and/or Supply Chain Management

- Familiarity with EAM industry-wide best practices, in-depth domain and technical knowledge
- Ability to lead solution design teams in major bids and project delivery.
- Experience in leading Strategic IT planning for multi million £ businesses.
- Ability to communicate effectively at Executive Director/Finance Director/CIO level within the client organisation.

A Degree, HND or recognised professional qualification is desirable however practical experience and enthusiasm for the role is of greater importance than academic qualifications.

Needed Skills, Education and Competencies

Technical Skills:

- Experience with one or more CMMS: Maximo (v5 onwards), SAP R/3, PR5, JD Edwards, DataStream, Ventyx/Indus Asset Suite
- Experience of working in a Solution Architect role

Interpersonal Skills:

- Strong customer facing skills.
- Liaise and communicate effectively in high-pressure project situations.
- Good written, oral & presentation communication skills.
- Confident to present solutions to customers in a formal & informal manner.
- Good team player with strong problem-solving skills.
- Good organisational skills with an emphasis on proactive issue management
