

CVS Abrams Adapter Kit

Adaptable to Challenger 2MBT, Leopard II MBT and LeClerc MBT

The Abrams Adapter Kit combines with the CVS Common Kit to outfit the numerous variants of the M1 series of Main Battle Tank and can be modified for use with European Union (EU) tank vehicles, such as the Challenger 2 MBT, Leopard II MBT, and LeClerc MBT. The Laser Transmitter Adapter mounts to the COAX gun flash shroud and mounts the Wireless Laser Transmitter (WLT) and other components from the CVS Common Kit to function over the wireless network as an Abrams weapons system.

Features include the following:

Laser Transmitter Adapter

- Mounts on the COAX gun flash shroud
- Provides adjustable laser beam to account for lead/elevation angle offsets
- Includes embedded solar panel with rechargeable battery
- Recharges adapter kit components in the transit case

Loader Module

- Mounts in the ammo-ready storage area
- Provides positive training by engaging the loader

Machine Gun Simulators

- Common Small Arms Transmitter (CSAT) with weapon-specific adapters

Tracer Effects

- Tracer effects injected into gunner's eyepiece for added realism

CVS Abrams Adapter Kit

M2 Small Arms Transmitter (SAT)

Abrams Adapter with WLT

M240 Small Arms Transmitter (SAT)

Loader's Module with WUI

Abrams Adapter
