

CVS Bradley Adapter Kit

Adaptable to Warrior IFV, Marder IFV, Piranha IFV, Pandur IFV (France), Dingo (Belgium) Recon/Future Rapid Effects System (UK)

The Bradley Adapter Kit combines with the CVS Common Kit to outfit numerous variants of the Bradley family of vehicles and can be modified to work with the Warrior IFV, Marder IFV, Piranha IFV, Pandur IFV, and the Dingo Recon/Future Rapid Effects System. Unlike the Abrams Adapter Kit, the Bradley Laser Transmitter Adapter has aural WESS to replicate weapons firing.

A cable-free TOW Weapon Effect Simulator mounts in the TOW launcher. This supports realistic loading and unloading of the system. Built with safety in mind, SAIC's cable-free TOW has multiple safety features to protect the warfighter from accidental discharge.

Features include the following:

- Laser Transmitter Adapter mounts on the main gun receiver
- Aural WESS for 25 MM firing
- Embedded solar panel with rechargeable battery
- Recharges adapter kit components in the transit case

TOW WESS Device

- Cable-free WESS solution with enhanced safety features
- Uses ATWESS M22 cartridge
- Powered by a self-contained, rechargeable battery
- Allows crew to follow normal reloading procedure
