SAIC Cloud Migration Edge™

Transforming Business with Cloud Services On Demand

SAIC's Cloud Migration Edge™ is a proven, comprehensive cloud solution to migrate IT applications to a cloud environment. Based on years of past performance successfully migrating systems, SAIC combines our cloud computing expertise with industry best practices to develop a methodology that can transform business. We understand challenges to IT budget and efficiency of operations and the urgency to transition to cloud technologies. As a cloud services integrator, SAIC is provider-agnostic and can focus on bringing the right cloud services individually customized to each customer. Our five-phase methodology migrates applications to the cloud in less time while efficiently managing risk and cost. With Cloud Migration Edge, SAIC can transition data center operations into a secure cloud environment with minimal disruption and optimal service value.

SAIC
Redefining Ingenuity™

PROVEN METHODOLOGY FOR A RELIABLE, SECURE CLOUD SOLUTION

SAIC's Cloud Migration Edge empowers business with cloud technologies. SAIC's unbiased approach as a cloud service integrator focuses on the best solutions from the cloud market to meet individual needs. With advanced cloud expertise and proven methodology, we can focus on the business while managing organizational change. Our flexible solution to cloud computing provides the best in cloud services with the agile adoption of disruptive technology securely, safely, and consistently.

Cloud Migration Edge Five Phase Methodology

ADVANTAGES OF SAIC'S APPROACH

Cloud Migration Edge fully enables business with cloud technologies.

- **SAIC is a cloud services integrator, not simply a cloud services provider.**
 - As provider-agnostic, our team can offer the best solutions from the cloud market to customize solutions for each customer's individual needs.
- **SAIC enables business transformation with deep cloud expertise and proven methodology.**
 - Our team leads with a business and mission focus.
 - Managing organizational change and operational redesign is key to our approach.
- **SAIC brings a decade of experience in systems engineering rigor and successful management of disruptive technologies.**
