

SAIC at MT3 Conference, Booth 209, June 1-4

SAIC will demonstrate healthcare and medical simulation technologies and the OLIVE virtual world for next-generation training and education at MT3

Science Applications International Corporation (SAIC) [NYSE: SAI] will demonstrate medical simulation technologies, products and services for medical training and education, telemedicine, rehabilitation, and research at Medical Technology, Training and Treatment Conference (MT3), June 1-4, Orlando, Fla. SAIC will also participate in the MT3 Medical Technology Innovations Showcase, making a presentation on “Using Virtual Simulation Technology for Medical and Healthcare Training and Support”.

SAIC will feature its enterprise-grade OLIVE virtual software platform in demonstrations that showcase healthcare and medical training and collaboration features in OLIVE, and the version 2.4 product release. Demonstrations include

- Deployed military member virtual family support for behavioral healthcare and transition
- Hospital emergency room medical team response to a shrapnel victim
- First responder and emergency medical team disaster response training

The demonstrations will display the power of OLIVE virtual worlds for next-generation collaboration, training, and interoperability in emergency and incident management, medical team training and education, behavioral healthcare delivery, and more.

Transforming Healthcare Delivery through Simulation Technologies

SAIC offers decades of experience in healthcare and modeling and simulation (M&S) technologies. SAIC medical simulation solutions offer a cost effective alternative to development of classroom training for medical professionals, the application of tele-behavioral health practices, and support for patient safety initiatives. SAIC also assists scientists with the integration of virtual reality technologies into studies of new treatments and therapies that help to expedite the rehabilitation process.

OLIVE is a powerful, 3-D software platform that enables organizations to deploy their own secure virtual worlds (VWs) behind firewalls. Hundreds of users can collaborate over computer networks using OLIVE’s video game-like user interface that provides access to a variety of functionality and media. OLIVE-based VWs bring together physical presence, action, voice, data, and media in realistic, context-specific, simulated environments with hypothetical or geo-specific terrain.

About SAIC

SAIC is a FORTUNE 500® scientific, engineering, and technology applications company that uses its deep domain knowledge to solve problems of vital importance to the nation and the world, in national security, energy and the environment, critical infrastructure, and health. The company's approximately 43,000 employees serve customers in the U.S. Department of Defense, the intelligence community, the U.S. Department of Homeland Security, other U.S. Government civil agencies and selected commercial markets. Headquartered in McLean, Va., SAIC had annual revenues of \$11.1 billion for its fiscal year ended January 31, 2011. For more information, visit <http://www.saic.com/>.
