

SAIC OLIVE™ Virtual World to be Demonstrated at the National Intrepid Center of Excellence on June 24, 2010

InWorld™ Solutions uses OLIVE to deliver new virtual clinical behavior therapies to military personnel and veterans

Science Applications International Corporation's (SAIC) [NYSE: SAI] Online Interactive Virtual Environment (OLIVE™) software platform will be used in a demonstration of InWorld Solutions online cognitive behavioral healthcare system, InWorld, on June 24, 2010 at the grand opening of the National Intrepid Center of Excellence (NICoE) in Bethesda, Md. The NICoE has selected the InWorld system and OLIVE to provide a new virtual therapy modality of treatment to military personnel and veterans with mild traumatic brain injury (mTBI), post traumatic stress disorder (PTSD), and other complex psychological health issues.

InWorld and OLIVE: Delivering Clinical Behavior Therapies in Immersive Virtual Worlds

InWorld will demonstrate the use of SAIC OLIVE's immersive virtual worlds technology and life-like human three-dimensional (3-D) avatars to deliver clinical behavioral therapies. The demonstration features:

- Rapidly engaging clients and maintaining their active participation
- Efficiently overcoming individual emotional barriers to therapy
- Accelerating the therapeutic progress
- Working effectively with clients remotely and in groups
- Providing playback from multiple perspectives to enable discussion and exploration for a faster, deeper understanding of behaviors, and refinement of strategies to use in the real world

InWorld's use of the OLIVE virtual world platform delivers improved, integrated behavioral healthcare to personnel at a lower, affordable cost. Created for clinical institutions and individual therapists, InWorld helps overcome emotional and cognitive barriers to therapy, counseling, and education by engaging clients and mobilizing their active participation. InWorld Solutions was the first to develop an online behavioral healthcare application in virtual environments.

"InWorld is designed to manage a wide range of disorders," said Les Paschall, InWorld Solutions co-founder and CEO of CFG Health Systems. "We're seeing unprecedented levels of engagement and participation with clients who suffer from oppositional defiance disorder, attention deficit hyperactivity disorder, and post-traumatic stress disorder, as well as patients dealing with issues of anger management and substance abuse."

OLIVE: Accelerates Development of Private Virtual Worlds for Collaboration, Learning, and Training

OLIVE is a market leading, enterprise grade software platform that enables customers to deploy their own private, persistent and secure 3-D virtual worlds where users can interact and collaborate over computer-generated networks. OLIVE's real-time, virtual technology enables interpersonal interaction through life-like human avatars. The avatars are 3-D virtual representations of real people that provide a human-machine interface for networked computers, enabling remote users to experience, collaborate, train, and learn. OLIVE is part of SAIC's portfolio of end-to-end modeling and simulation and training solutions and the SimInsight™ Platform of simulation services.

About InWorld Solutions

InWorld Solutions, LLC (www.inworldsolutions.com), based in Palo Alto, Calif., is dedicated to bringing new technology to the field of behavioral healthcare. The company was created by a partnership of experts in neuroscience and clinical psychology from Greenleaf Medical and CFG Health Systems. It is tapping a new genre of virtual environments to offer therapists and health care providers a new therapy medium through SAIC's OLIVE-powered virtual world where clinicians, patients, therapists and families can meet, become an integrated part of the care process, and practice and sustain new skills and behaviors.

About NICoE

The National Intrepid Center of Excellence (NICoE), opening Summer 2010, is an advanced facility dedicated to research, diagnosis and treatment of military personnel and veterans suffering from mTBI and psychological health (PH) issues. Located on the Navy campus at Bethesda, Maryland, adjacent to the new Walter Reed National Military Medical Center, the NICoE will provide the most advanced services for diagnostics, treatment plans and family education, introduction to therapeutic modalities, referral and reintegration support for military personnel and veterans with mTBI, PTSD, and complex PH issues.
