SAIC CyberSecurity Edge™

Protecting Customers from Cyber Risks Using a Repeatable and Proactive Approach

SAIC CyberSecurity Edge is an end-to-end solution that meets current and future customers’ cybersecurity life cycle management needs. Our solution standardizes the complex process of an organization’s cybersecurity needs and requirements fast, effectively, and in a cost-effective manner. By offering services that easily fit any size or type of network, customers receive a tailored solution without breaking the bank.

SAIC’s architecture is designed to help thwart operational disruption, intellectual property loss and fraud, and loss of public trust that often results from cyberattacks. SAIC’s force of more than 350 cybersecurity professionals are ready to protect our customers’ interests today and for the future.
A Proven Multi-Phased Approach to Cybersecurity

SAIC CyberSecurity Edge allows our team of experts to manage an entire network security life cycle, providing a detailed risk profile. Our team also offers a configurable solution that is tailored to the customer’s risk tolerance and budget requirements.

Advantages of SAIC’s Approach

**Verified | Recognized**
- Proven methodologies that have been developed and refined over countless engagements.

**Automated | Optimized | Balanced | Tailored**
- Offers customer-tailored solutions without the customization price tag.
- Optimizes current customer toolset.
- Fills gaps to strengthen ecosystem.
- Automates information assurance tasks.
- Balances tools, risk tolerance, and budget.

**Packaged | Defined**
- Clearly defines scope across all three phases with a fixed-priced model.

**Discover** offers highly trained objective experts to identify real-world security risk and validate the implementation and effectiveness of an organization’s existing security controls against industry recognized best practices and adversarial threats.

**Mitigation** is a highly tailored offering designed to help a customer design, plan, and implement solutions to meet specific goals and improve overall cybersecurity.

**Manage** provides cost efficient, low risk options for ongoing and continuous monitoring support by certified cybersecurity experts.

- Three options include managed, staff, and hybrid.
