

Jocelyn Leatherwood

Data Scientist Team Manager/Project Manager
Defense and Civilian Sector

Jocelyn Leatherwood is a data scientist team manager and project manager in SAIC's Defense and Civilian Sector, supporting the enterprise data warehouse program for the Forest Service of the U.S. Department of Agriculture.

Jocelyn joined SAIC in 1997 as a technical writer on the mission-oriented systems engineering support (MOSES) contract supporting the Environmental Protection Agency. On another MOSES task order, she developed environmental data standards, managed ISO-compliant metadata, developed life-cycle documentation and led the data registry integration test team.

Jocelyn has over 30 years of experience in the information management field, with over a decade of experience in the data management field, including metadata development and management for the EPA, Veterans Health Administration, National Cancer Institute, Department of Defense and the interagency National Wildfire Coordinating Group.

Jocelyn has supported the Forest Service's enterprise data warehouse for over 10 years, serving in various capacities but particularly in the areas of data governance and data life-cycle management.

Jocelyn holds a bachelor's degree from the University of Wisconsin.
