

# Jefferey Duncan

Program Manager and Cyber Engineer Lead, C5ISR Systems Solutions  
Defense and Civilian Sector

**Jefferey Duncan** is the program manager for SAIC's cybersecurity support services contract supporting Naval Information Warfare Center Pacific and the cyber engineer lead under Naval Air Systems Command for the Comprehensive Automated Maintenance Environment-Optimized (CAMEO) system.

Prior to joining SAIC in 2016 as a cybersecurity lead for CAMEO and the Readiness Integration Center, Jefferey held numerous positions within the cybersecurity realm, supporting both CONUS and OCONUS anti-terrorism force protection systems and conducting information assurance assessments and information assurance certification and accreditation as a U.S. Navy validator.

Jefferey has supported the U.S. Marine Corps as a technical lead for industrial controls systems for the assistant chief of staff G-6 at Marine Corps Base Camp Pendleton and the command cyber readiness inspection process for both the Marine Corps' and Naval Information Warfare Center Pacific's (NIWC) research, development, test and evaluation environments. He worked with the Information Assurance Technical

Authority for NIWC to create technical standards, defense-in-depth functional implementation architecture, cybersafe, system inheritance, risk management and continuous monitoring while providing input on the Risk Management Framework Validator training curriculum.

Jefferey also worked on the NIWC transition team from the Department of Defense Information Assurance Certification and Accreditation Process to the Risk Management Framework for the Navy's Consolidated Afloat Networks and Enterprise Services program and other Navy programs and managed many technical projects under NIWC for a broad range of systems and applications.

Earlier in his career, Jefferey went from being a FedEx driver to a food and beverage controller in the hotel industry to a technical program manager at Arrow Electronics, where he supported over \$30 million in inventory, and at Comstor, where he supported Cisco router sales that totaled over \$15 million.

Jefferey is a member of both the Zen Nippon Airinkai Norcal and San Diego koi clubs.
